EXPERIENCE

Shipdelight Logistic Technologies,

Mumbai — *Software Developer*

JUNE 2023 - JAN 2024

- As Shipdelight has multiple products, I was working with few of them.
- Using FastAPI, MongoDB and Celery my major task was to write RestAPI which was further used by the UI team for integration, booking orders, fetching data from client apis and calling other third-party apis.
- Celery was used to run background tasks, or to run tasks which should be run into multiple batches.
- Another big project was Smart-Booking, where we used the same stack and here we were sending requests to courier partners API and booking an order. This project was made in a dynamic format so that other product integrations can be done easily.

G-Square Solutions Pvt Ltd,

Mumbai — *Full Stack Developer*

Nov 2021 - May 2023

- Working with G-Square and their products was a big opportunity as individually I was supposed to improvise the front-end as well as back-end part of the product Narrator.
- As Narrator is a product like PowerBI, we need data to do analysis and show data in tabular and graphical format, so for that from client discussion to writing ETL scripts and data validation on client and our data warehouse side was my part.
- Initiated to make a new product using Django as our ETL product.
- Maintaining Github repos and deployment of code on Github and also on servers was my task for projects assigned to me.

SKILLS

- Python, FastAPI, Django, Django Rest Framework, Pandas, (PySpark learning phase)
- SQL, MySQL, Postgres
- MongoDB
- Github, JWT, Redis, AWS, Celery

LANGUAGES

English, Marathi, Hindi

- We used core Python, Pandas, PostgreSQL, MongoDB and for front-end Javascript, HTML and CSS.

Riya Travels, Mumbai — *Jr. Software Engineer*

DEC 2019 - OCT 2021

- Here I started my career with PHP and worked as a Full Stack.
- Here I got to learn a lot of things, as a whole module I was building locally and integrating it on a development server through FileZilla.
- Also worked on Android Studio for a few months, completed a few pages and submitted to Senior for further integration.

EDUCATION

Institute of Management and Entrepreneurship Development, Pune — MCA

JUN 2018 - JUN 2020

Completed MCA with 8.04 CGPA

Institute of Management and Entrepreneurship Development, Pune — BCA

JUN 2015 - APR 2018

Completed BCA with 7.92 CGPA

PROJECTS

DRF-REACT-ECOM — *Web Application*

As I was relieved early by my previous organization, I started a project using Django Rest Framework and ReactJs. It is completely made by myself for practice purposes, not from any reference or cloned.

Firstly started with the backend part and completed the basic structure for my application.

Front-end part is on the way to get completed, still lots of work to do.

You can find source code for React and Django Rest Framework in Github as I already had created repositories for them.
